

ANTI RADIATION PROTECTORS

TV , PC , CELLULARS , MICROWAVES

What Happens When We Use PLT Telephone Button ?

Fig 1 : General picture of the microwaves rays .
Microwaves have a source of unstable
Rays that often crosses point 0 .

Figure 1

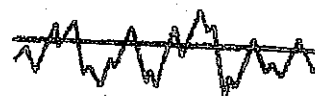

Fig 2 : Shows the oscillation frequency of a human
Encephalic cell (DNA) which spread
With harmony on each side of point 0 .

Figure 2

Fig 3 : Shows how after penetration of microwaves
On the superior part of point 0 of the DNA
Oscillations , the organic resonance's are
Disturbed . DNA Oscillations of the encephalic
Cells are then influenced strongly .

Figure 3

Fig 4 : Shows the general harmonious profile of the
Microwave oscillation curve after placing
PLT telephone button on the cell phone .
Microwaves do not cross point 0 any more .

Figure 4

Fig 5 : Clearly shows that the body has no more
Resonance point . It harmoniously identify
The microwave rays as non aggressive and
Do not react. We have an immediate result .

Figure 5

HOW CAN PLT TELEPHONE BUTTON HELP ?

The Electro-smog biologically harmful is harmonized by the " re-ordering " of the information's at the level of the sub-molecular structures and become biologically positive.
Any kind of Electro-smog can be harmonized with PLT products and become safe .

MICROWAVES :

Several researchers have proved that microwave rays from cellular phones are harmful. Microwave rays penetrates the organic substances and make the water molecules vibrate .
When we use a cell phone , the microwaves penetrates the internal ear and the encephalic region. Many are the people presenting a negative reaction to this aggression and suffer from symptoms such as :
Elevation of the intra-oculars pressure , eye blinking , allergies , heart fibrillation , muscle pains, tiredness , nervousness ...

It is also scientifically established that microwave rays of the cell phone considerably increase the risk of brain tumor , due to the fact that microwaves which penetrates modify the information of the DNA (conductors of the chromosomes information) , thus can cause a cellular proliferation .

The solution is to equip all cell phones , mobile phones , hand phones with PLT telephone button. The microwave rays are then completely changed from negative to biologically positive . This is clearly shown by the kinesiology muscle test .

All our products have an unlimited time efficiency .

Results can be obtained with a blood test . We clearly see the difference between these 2 crystal pictures (blown 100 time each) from human blood .

The left picture show the blood of a man presenting a normal crystal configuration with angles almost never exceeding 90 degrees .

The right picture shows the blood of a patient suffering from the action of his cell phone. We are shocked by the linear crystal structures and by the number of inclinations at 90 degrees .

If such a structure appears at macro-crystalline level of the blood , the patient is considered ill .
